Technical Requirements

Hardware Requirements

- Operating Systems Supported: Windows 2008 server
- Choose the most memory you can afford. 4 GB is the minimum we recommend
- Choose the largest disk space running at the fastest RPM, with an onboard RAID 1 controller (for mirroring 2 identical disks). 2 100 GB mirrored drives is the minimum we recommend.
- Single CPU is probably fine. Get the best one you can afford at highest GHz.
- CD RW drive
- Gigabit network card comes standard in almost any server box these days.
- UPS with software to perform proper shutdown in case of power failure
- Printer with scanner in built.

Software Requirements

- Visual Studio
- Internet Information Server (IIS)
- SQL Server
- Windows Server
- Report Writer

It should be easy to install and configure the software even with new versions of third party software.
